 Correction for 'Probing keto–enol tautomerism using photoelectron spectroscopy' by Nathalie Capron  
*et al.*, *Phys. Chem. Chem. Phys.*, 2015, **17**, 19991–19996.

rsc.li/pccp

The authors would like to make a correction to Table 6 in the published article where the data reported do not correspond to the legend.

The reported basis set in Table 6 is not the “Set of coefficients and exponents corresponding to **oxygen core ionized** optimized unrestricted HartreeFock (UHF) configurations for 6-31G basis set as calculated in ref. 54” as indicated in the caption, but is actually the **ground state basis set of oxygen atom**...

The corrected Table 6 is shown below.

**Table 6** Set of coefficients and exponents corresponding to oxygen core ionized optimized unrestricted HartreeFock (UHF) configurations for 6-31G basis set as calculated in ref. 54

O-631G*+(3s,3p,2d)	Exponents	(s) Coefficients	(p) Coefficients	(d) Coefficients
