Correction: Comprehensive insights into the charge dynamics process and excellent photoelectric properties of heterojunction solar cells

Xiangyang Liu,* Shun Wang, Haiwu Zheng, Xiuying Cheng and Yuzong Gu*

DOI: 10.1039/c8cp91825bCorrection for 'Comprehensive insights into the charge dynamics process and excellent photoelectric
properties of heterojunction solar cells' by Xiangyang Liu *et al.*, *Phys. Chem. Chem. Phys.*, 2016, **18**,
24299–24306.

The authors wish to draw the readers' attention to their two closely related papers, published at nearly the same time in ACS Applied Materials & Interfaces¹ and Applied Physics Letters,² which should have been cited in this Physical Chemistry Chemical Physics paper.

All three papers report improvements in the performance of a bulk heterojunction solar cell with inclusion of graphene nanoplates in the active region. The device structures are very similar, differing primarily in the electron acceptor, which was Zn_2SnO_4 nanoparticles in the *Physical Chemistry Chemical Physics* paper, Zn_2SnO_4 nanorods in ref. 1 and ZnO nanorods in ref. 2. Therefore, ref. 1 and 2 should have been cited in this *Physical Chemistry Chemical Physics* paper.

The authors regret that there is unattributed overlap in text and Fig. 1a, 2a, 3a and 4a between this *Physical Chemistry Chemical Physics* paper and ref. 1. The figures were reproduced from ref. 1 for the readers' information.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
