Correction for 'Synthesis of γ -alumina (Al_2O_3) nanoparticles and their potential for use as an adsorbent in the removal of methylene blue dye from industrial wastewater' by Shafqat Ali *et al.*, *Nanoscale Adv.*, 2018, DOI: 10.1039/c8na00014j.

The authors wish to amend the sections of the manuscript detailed below. These corrections are due to inaccuracies in the adsorption activity, as well as in the surface area of the adsorbent.

The corrections are as follows:

- (1) On page 1, the sentence including "4.13 nm and the surface area is $112.9 \text{ m}^2 \text{ g}^{-1}$ " should instead read as "4.55 nm and the surface area is $120.7 \text{ m}^2 \text{ g}^{-1}$ ".
- (2) On page 1, in the sentence including "490 to 2210 mg g^{-1} " should instead read as "483 to 2190 mg g^{-1} ".
- (3) On page 3 (left column), the sentence including " $16.00 \text{ m}^2 \text{ g}^{-1}$ " should instead read as " $120.7 \text{ m}^2 \text{ g}^{-1}$ ", and "4.13 nm" should instead read as "4.55 nm".
- (4) On page 4 (left column), the sentence including " 808 mg g^{-1} " should instead read as " 790 mg g^{-1} ".
- (5) Page 5 (right column), the sentence including " 868 to 1000 mg g^{-1} " should instead read as " 849 to 1000 mg g^{-1} ".
- (6) Page 5 (right column), the sentence including " $422, 431, 481$ and 490 mg g^{-1} " should instead read as " $417, 425, 476$ and 483 mg g^{-1} ".
- (7) Page 5 (right column), the sentence including " $1812, 2061, 2164$ and 2210 mg g^{-1} " should instead read as " $1800, 2043, 2110$ and 2190 mg g^{-1} ".
- (8) Page 5 (left column), the sentence including " 868 to 1000 mg g^{-1} " should instead read as " 849 to 1000 mg g^{-1} ".
