Correction: Revisiting syntheses of Ti(IV)/H_2PO_4–HPO_4 functional ion-exchangers, properties and features

Mylène Trublet,*[a] Daniela Rusanova[a] and Oleg N. Antzutkin[ab]

Correction for 'Revisiting syntheses of Ti(IV)/H_2PO_4–HPO_4 functional ion-exchangers, properties and features' by Mylène Trublet *et al.*, *New J. Chem.*, 2017, DOI: 10.1039/c7nj03065g.

The authors would like to correct Table 1, as the initial TiO_2 content for samples SA3 and SA4 is incorrect in the published article. The correct Table 1 is shown below.

Table 1 Synthesis conditions for TiP1 sorbents synthesized using different titanium sources

Ti source name	Source	Initial TiO_2 content (%)	State	$[TiO_2]_f$ (g L^{-1})	$[H_2SO_4]_f$ (g L^{-1})	Yield[a] (%)
A	Apatity, Russia	~7	Liquid	62	405	89
SA1	Sigma Aldrich	~29	Powder	60	441	64
SA2	Sigma Aldrich	~29	Powder	66	397–410	65
SA3	Sigma Aldrich	~7	Liquid	76	394	71
SA4	Sigma Aldrich	~8	Liquid	110	356–409	95

$[]_f$: concentration before adding H_3PO_4 during the synthesis process.[a] Calculated based on the initial titanium concentration.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
