Correction for 'Nanocrystals self-assembled in superlattices directed by the solvent–organic capping interaction' by Cleocir José Dalmaschio *et al.*, *Nanoscale*, 2013, **5**, 5602–5610.

The authors have noticed an error in Fig. 4 in the original article. In the previously published figure, Fig. 4a and c are identical, due to an error when creating the figure. The new Fig. 4 provided below replaces the originally published figure and contains the correct images. This error does not affect the experimental data, results analysis and conclusions of the work.

**Fig. 4** The effect of solvent on the intercrystal distances in monolayer depositions: (a) chloroform, (b) toluene, and (c) hexane. (d) Sine fitting from plot profile intensities in monolayer deposition in different solvents.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
