Correction: Green synthesis of bacterial mediated anti-proliferative gold nanoparticles: inducing mitotic arrest (G2/M phase) and apoptosis (intrinsic pathway)

C. Ganesh Kumar,*[a,b] Y. Poornachandra[a,b] and Cheemalamarri Chandrasekhar[a]

DOI: 10.1039/c8nr90221f

rsc.li/nanoscale

Correction for 'Green synthesis of bacterial mediated anti-proliferative gold nanoparticles: inducing mitotic arrest (G2/M phase) and apoptosis (intrinsic pathway)' by C. Ganesh Kumar *et al.*, *Nanoscale*, 2015, **7**, 18738–18750.

The authors regret that the original images in Fig. 5d and e contained errors. While arranging the panel of micrographs and other bar graphs in a single frame (Fig. 5) using Adobe Illustrator software, the fluorescence microscopy images for Fig. 5d and e were copied multiple times due to an error in the image processing software. The correct images for Fig. 5d and e are shown below. The new images do not affect the results presented in the paper.

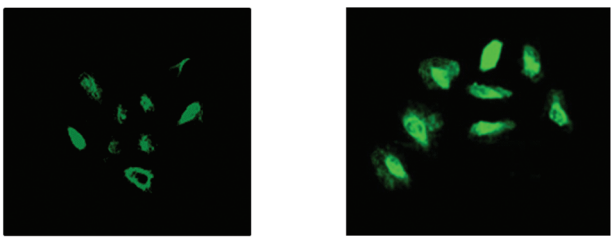

Fig. 5 d–e Fluorescence microscopy images to show the accumulation of intracellular ROS in DU145 cells induced by SCS and b-AuNP.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
