## Correction: $\text{Zn}_2\text{SnO}_4\text{:Cr,Eu}$ ultra-small nanoparticles as new near infrared-emitting persistent luminescent nanoprobes for cellular and deep tissue imaging at 800 nm

Jin-Lei Li,<sup>a,b</sup> Jun-Peng Shi,<sup>a</sup> Cheng-Cheng Wang,<sup>a,b</sup> Peng-Hui Li,<sup>a,b</sup> Zhen-Feng Yu<sup>a,b</sup> and Hong-Wu Zhang<sup>\*a</sup>

Correction for ' $\text{Zn}_2\text{SnO}_4\text{:Cr,Eu}$  ultra-small nanoparticles as new near infrared-emitting persistent luminescent nanoprobes for cellular and deep tissue imaging at 800 nm' by Hongwu Zhang *et al.*, *Nanoscale*, 2017, **9**, 8631–8638.

The authors have noticed that some errors, such as a typographical error of  $\text{Zn}_2\text{SnO}_4$ , incorrect XRD patterns and miscalculated particle sizes, were present in the originally published version of this article.

The corrections that should be noted are as follows:

- (1) In our paper, from analysis of the XRD patterns in Fig. 1(f), the as-prepared nanoparticles were shown to be  $\text{Zn}_2\text{SnO}_4$ , as stated throughout the manuscript. The incorrect chemical formula " $\text{ZnSn}_2\text{O}_4$ ", listed in the title and abstract, should be corrected to " $\text{Zn}_2\text{SnO}_4$ ".
- (2) All mentions of a particle size of 5 nm in the original article were not correct, and thus should be corrected to " $7.3 \pm 0.6$  nm". The reference to a particle size of 5 nm has also been removed from the title.
- (3) The size distribution shown in Fig. 1c in the original article was incorrect. The corrected version of Fig. 1c is given below.
- (4) The XRD pattern shown in Fig. 1f in the original article was incorrect. The corrected version of Fig. 1f is given below.

Fig. 1 (c) Size of ZSO distribution. (f) X-ray diffraction pattern of ZSO.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
