Correction for 'New di-anchoring  $A-\pi$ - $D-\pi$ -A configured organic chromophores for DSSC application: sensitization and co-sensitization studies' by Praveen Naik *et al.*, *Photochem. Photobiol. Sci.*, 2018, DOI: 10.1039/c7pp00351j.

The authors would like to correct an error in the synthetic procedure for compound  $E_3$ , as the temperature reported in the published article is incorrect. The correct temperature is 60 °C, and the relevant sentence should read:

The mixture was dissolved in 20 mL of absolute methanol and then stirred at 60 °C for 12 h under an argon atmosphere. The authors would also like to correct Table 2, as the data reported in this table are incorrect in the published article. The

correct Table 2 is shown below.

Table 2J-V parameters of DSSCs sensitized with  $E_{1-3}$ 

Sensitizer	CDCA (mM)	$J_{ m SC}~({ m mA~cm^{-2}})$	$V_{\rm OC}$ (V)	FF (%)	η (%)
E1	10	$6.359 \pm 0.012$	$0.599 \pm 0.001$	$62.5 \pm 0.2$	$2.383 \pm 0.008$
E <sub>2</sub>	10	$1.369 \pm 0.003$	$0.510 \pm 0.003$	$59.8 \pm 0.4$	$0.417 \pm 0.002$
E <sub>3</sub>	10	$1.450\pm0.015$	$0.484 \pm 0.001$	$56.8 \pm 0.1$	$0.399 \pm 0.003$

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
