Correction: Ascorbic acid/Fe⁰ composites as an effective persulfate activator for improving the degradation of rhodamine B

Xiangyu Wang,*a Yi Du,a Huiling Liub and Jun Mab

DOI: 10.1039/c8ra90046a

www.rsc.org/advances

Correction for 'Ascorbic acid/Fe⁰ composites as an effective persulfate activator for improving the degradation of rhodamine B' by Xiangyu Wang *et al.*, *RSC Adv.*, 2018, **8**, 12791–12798.

The authors regret that the unit on the *x*-axis of Fig. 1 was incorrectly written as "% wt" rather than " $\frac{1}{0}$ " wt" in the original article. The correct version of Fig. 1 is presented below.

RSC Advances Correction

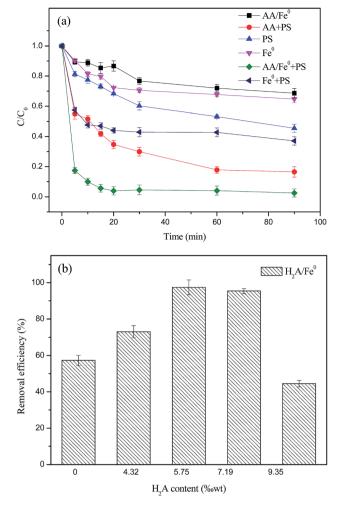

Fig. 1 (a) Comparison of removal efficiency of RhB in different systems ($C_0 = 50 \text{ mg L}^{-1}$, PS dosage $= 1.4 \text{ g L}^{-1}$, Fe 0 dosage $= 1 \text{ g L}^{-1}$, H₂A/Fe 0 dosage = 1 g L $^{-1}$, H₂A dosage = 1.6 g L $^{-1}$ and T = 298 K); (b) effect of H₂A concentration on removal efficiency of RhB in the H₂A/Fe 0 – PS system $(C_0 = 50 \text{ mg L}^{-1}, \text{Fe}^0 \text{ dosage} = 0.8 \text{ g L}^{-1}, T = 298 \text{ K} \text{ and the solution volume is 50 mL}).$

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
