## Correction: A study on a telo21 G-quadruplex DNA specific binding ligand: enhancing the molecular recognition ability *via* the amino group interactions

Dongli Li,<sup>ab</sup> Jin-Qiang Hou,<sup>c</sup> Wei Long,<sup>c</sup> Yu-Jing Lu,<sup>bc</sup> Wing-Leung Wong<sup>\*ab</sup> and Kun Zhang<sup>\*ab</sup>

Correction for 'A study on a telo21 G-quadruplex DNA specific binding ligand: enhancing the molecular recognition ability *via* the amino group interactions' by Dongli Li *et al.*, *RSC Adv.*, 2018, **8**, 20222–20227.

The authors regret that ds26, telo21 and RNA were labelled incorrectly in Fig. 2 in the original manuscript. The corrected Fig. 2 is displayed below.

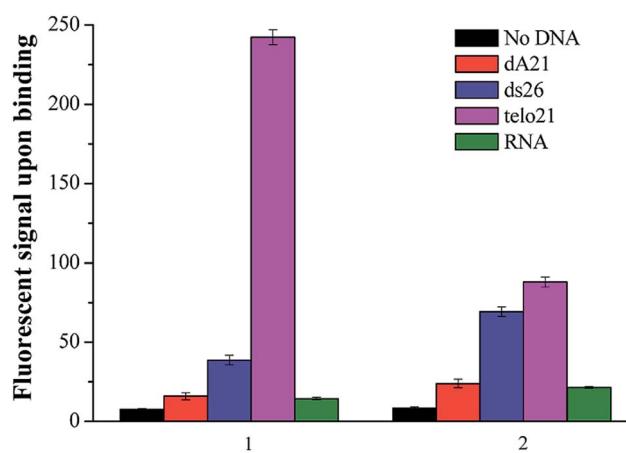

Fig. 2 (A) A comparison of side group effects of the binding ligand: **1** R = N(CH<sub>3</sub>)<sub>2</sub> and **2** R = SCH<sub>3</sub> in the recognition and sensing of different nucleic acids including single-stand DNA dA21, duplex DNA ds26, G-quadruplex DNA telo21, and RNA. The concentration of the ligand was fixed at 5  $\mu$ M.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
