Expression of concern for 'Controlled synthesis of pentachlorophenol-imprinted polymers on the surface of magnetic graphene oxide for highly selective adsorption' by Sheng-Dong Pan et al., J. Mater. Chem. A, 2014, 2, 15345–15356.

The following article 'Controlled synthesis of pentachlorophenol-imprinted polymers on the surface of magnetic graphene oxide for highly selective adsorption' by Sheng-Dong Pan<sup>ab</sup>, Hao-Yu Shen<sup>c</sup>, Li-Xin Zhou<sup>d</sup>, Xiao-Hong Chen<sup>ab</sup>, Yong-Gang Zhao<sup>ab</sup>, Mei-Qiang Cai<sup>e</sup> and Mi-Cong Jin\*<sup>ab</sup> has been published in *Journal of Materials Chemistry A*. The article reports the synthesis of a magnetic graphene oxide sheet embedded with core–shell molecularly imprinted polymer microspheres *via* a reflux-precipitation polymerization and surface imprinting technique.

*Journal of Materials Chemistry A* is publishing this expression of concern in order to alert our readers that we are presently unable to confirm the accuracy of the image presented in Fig. 1f of this *Journal of Materials Chemistry A* paper.

We have contacted the Ningbo Municipal Center for Disease Control and Prevention to request an investigation into the validity of the published figures and this notice will be updated when a conclusive outcome is reached.

An expression of concern will continue to be associated with the article until a conclusive outcome is reached.
