Expression of concern: Preparation of face-centered-cubic indium nanocubes and their superior dehydrogenation activity towards aqueous hydrazine with the assistance of light

Simon R. T. Neil

The following article ‘Preparation of face-centered-cubic indium nanocubes and their superior dehydrogenation activity towards aqueous hydrazine with the assistance of light’ by Fang Luoab, Xue Miaoab, Wei Chu*, Ping Wuba and Dong Ge Tongab has been published in Journal of Materials Chemistry A. The article reports the preparation of face-centered-cubic indium nanocubes and their dehydrogenation activity towards hydrazine.

Journal of Materials Chemistry A is publishing this expression of concern in order to alert our readers that we are presently unable to confirm the accuracy of the data reported in the TEM images in Fig. 1a of this Journal of Materials Chemistry A paper and Fig. S1, S3a–c, S4, S5a–e, S6a–g, S13a–d, S14a–b, S15a–b, and S33a–b of the ESI.

The College of Materials and Chemistry & Chemical Engineering, Chengdu University of Technology has confirmed that the original TEM files are not available. The authors are in the process of repeating the experiments to confirm the validity of the TEM images in the published figures. This notice will be updated when a conclusive outcome is reached.
