Correction for ' K_2MnF_6 as a precursor for saturated red fluoride phosphors: the struggle for structural stability' by Reinert Verstraete *et al.*, *J. Mater. Chem. C*, 2017, **5**, 10761–10769.

The authors wish to acknowledge the work performed by Bode and Wendt,¹ Roisnel *et al.*² and Palacio *et al.*³ on the structural characterization of K_2MnF_6 , $\text{K}_2\text{MnF}_5 \cdot \text{H}_2\text{O}$ and $\text{KMnF}_4 \cdot \text{H}_2\text{O}$ respectively, of which the crystal structures are shown in Fig. 1, 7 and 8 of the original article. In addition, the authors would like to cite the work of Hoppe and Wandner⁴ suggesting the role of trace impurities when evaluating the stability of K_2MnF_6 in air and describing the discoloration of the compound when in contact with glass.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
