 Correction for 'Synthesis of a well-dispersed  $\text{CaFe}_2\text{O}_4/\text{g-C}_3\text{N}_4/\text{CNT}$  composite towards the degradation of toxic water pollutants under visible light' by Fei Liu *et al.*, *RSC Adv.*, 2019, 9, 25750–25761.

The authors regret that mistakes were made during the preparation of Fig. 1 in the published article. In the original article, Fig. 1 presented XRD data for  $\text{CaFe}_2\text{O}_4/\text{CNT}$ , which inadvertently duplicated the data for  $\text{CaFe}_2\text{O}_4$ . In addition, the spectra in the original figure do not match with the relevant discussion of Fig. 1 (on page 25753–25754) which referred to XRD patterns for  $\text{g-C}_3\text{N}_4$ ,  $\text{CaFe}_2\text{O}_4$  and  $\text{CaFe}_2\text{O}_4/\text{g-C}_3\text{N}_4/\text{CNT}$  composite. The correct image for Fig. 1 is shown below but no changes are required to the associated discussion of Fig. 1.

 Fig. 1 XRD patterns of the as-prepared  $\text{CaFe}_2\text{O}_4$  and  $\text{CaFe}_2\text{O}_4/\text{g-C}_3\text{N}_4/\text{CNT}$  composite.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
