Correction: A flow focusing microfluidic device with an integrated Coulter particle counter for production, counting and size characterization of monodisperse microbubbles

J. M. Robert Rickel, Adam J. Dixon, Alexander L. Klibanov and John A. Hossack

Correction for ‘A flow focusing microfluidic device with an integrated Coulter particle counter for production, counting and size characterization of monodisperse microbubbles’ by J. M. Robert Rickel et al., Lab Chip, 2018, 18, 2653–2664.

The authors regret that the coefficients presented in Table 1 in the original article were incorrect. The corrected Table 1 is shown below.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.

### Table 1 Values of coefficients that determine the curves produced by eqn (3) and (4). The curve in the top subplot of Fig. 5C uses the 10–17.5 μm microbubble (MB) coefficients. The curves in the bottom subplot of Fig. 5C and 7B use the normalized value ‘c’ coefficients. The surface plot of Fig. 7A uses the ‘b’ coefficients
