## Correction: Desymmetrization of disubstituted aromatic crown ethers *via* intramolecular Cannizzaro reactions

Mason A. Rouser and Harry W. Gibson\*

 Correction for 'Desymmetrization of disubstituted aromatic crown ethers *via* intramolecular Cannizzaro reactions' by Mason A. Rouser *et al.*, *New J. Chem.*, 2019, **43**, 16801–16805.

The authors would like to correct Fig. 1, as the peaks are labeled incorrectly in the published article. The label at  $m/z$  628.2979 should read " $2e + NH_4^+$ " and the peak at  $m/z$  633.2533 should be labeled " $2e + Na^+$ ". The correct Fig. 1 is shown below.

**Fig. 1** ESI HR MS of DB30C10 acid-alcohol product **2e** obtained using  $Ba(OH)_2$  as the base and templating agent in the intramolecular Cannizzaro reaction of dialdehyde **2c**. Note the absence of starting dialdehyde **2c** [ $m/z$  593.3 ( $M + H$ ) $^+$ ], diol **2b** [ $m/z$  614.3 and 619.3 ( $M + NH_4$ ) $^+$ ] and diacid **2d** [ $m/z$  642.3 ( $M + Na$ ) $^+$ ], products that were formed when NaOH was used as the base.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
