 Correction for ' $\text{CuCo}_2\text{S}_4$  nanocrystals as a nanoplatform for photothermal therapy of arterial inflammation' by Xing Zhang *et al.*, *Nanoscale*, 2019, **11**, 9733–9742.

The authors have noticed that an incorrect image was used for the 'Control' liver image in Fig. 7. A corrected version of Fig. 7 is therefore given below.

**Fig. 7** Representative images of HE staining of the main visceral organs in the Apo E  $^{-/-}$  mice treated with the  $\text{CuCo}_2\text{S}_4$  NCs after the PTT. There were no significant differences in the heart, liver, spleen, lung, kidney and intestine between the  $\text{CuCo}_2\text{S}_4$  + NIR group and PBS control group, and no obvious lesions such as injury or inflammation were observed. All scale bars = 100  $\mu\text{m}$ .

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
