## Correction: Lacto-N-tetraose synthesis by wildtype and glycosynthase variants of the $\beta$ -Nhexosaminidase from *Bifidobacterium bifidum*

Katharina Schmölzer, a Melanie Weingarten, b Kai Baldenius and Bernd Nidetzky\*a,c

DOI: 10.1039/c9ob90088h rsc.li/obc

Correction for 'Lacto-N-tetraose synthesis by wild-type and glycosynthase variants of the  $\beta$ -N-hexosaminidase from *Bifidobacterium bifidum*' by Katharina Schmölzer *et al.*, *Org. Biomol. Chem.*, 2019, DOI: 10.1039/c9ob00424f.

The authors regret that there was an error in some of the structures shown in Scheme 1. The correct graphic is shown below.

Scheme 1 Strategy of lacto-*N*-tetraose (LNT) synthesis from lacto-*N*-biose 1,2-oxazoline (LNB-oxa) by LnbB from *B. bifidum*. (a) Hydrolysis of LNT by wild-type LnbB. (b) Proposed catalytic mechanism of LnbB. (c) LNB 1,2-oxazoline as possible donor substrate for synthesis of LNT *via* glycosylation of lactose.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
