Correction for 'Iodine mediated oxidative cross coupling of 2-aminopyridine and aromatic terminal alkyne: a practical route to imidazo[1,2-*a*]pyridine' by Surya Kanta Samanta *et al.*, *Org. Biomol. Chem.*, 2019, **17**, 6441–6449.

There were some minor errors in the article, which should be corrected as follows.

Table 1, footnote *a* should be corrected to read 'Reaction conditions: **1a** (1.2 equiv.), **2a** (1.0 equiv.), I₂ (30 mol%), DMSO (2.0 ml), reflux at 90 °C (10–12 h)'.

In the sentence included immediately above Scheme 3, '2-aminopyridine **1a**' should be corrected to '2-aminopyridine **2a**'. The corrected sentence should read 'Therefore, 2-aminopyridine **2a** and the aromatic terminal acetylene were allowed to react under the optimized reaction conditions but at 125 °C and methylthiolated imidazo[1,2-*a*]pyridine derivative **7** was isolated with fairly good yield (Scheme 3)'.

Table 3, footnote *a* should be corrected to read 'Reaction conditions: **1** (1.2 equiv.), **2a** (1.0 equiv.), I₂ (30 mol%), DMSO (2.0 ml), reflux at 125 °C (16–18 h)'.

In the General methods section '¹³C {¹H} NMR spectra' should read '¹³C NMR spectra'.

In the 'Typical procedure for synthesis of product **3a**', in the first sentence 'iodine (80.7 mg, 0.25 mmol)' should be corrected to 'iodine (76.2 mg, 0.30 mmol)', and in the last sentence '**3a** as a white solid (1.44 mg, 74% yield)' should be corrected to '**3a** as a white solid (144 mg, 74% yield)'.

In the 'Typical procedure for synthesis of product **7a**', in the first sentence 'iodine (80.7 mg, 0.25 mmol)' should be corrected to 'iodine (76.2 mg, 0.30 mmol)'.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
