Correction for 'Synthesis of a well-dispersed $CaFe_2O_4/g$ - C_3N_4/CNT composite towards the degradation of toxic water pollutants under visible light' by Fei Liu *et al.*, RSC Adv., 2019, **9**, 25750–25761.

The authors regret that mistakes were made during the preparation of Fig. 1 in the published article. In the original article, Fig. 1 presented XRD data for $CaFe_2O_4/CNT$, which inadvertently duplicated the data for $CaFe_2O_4$. In addition, the spectra in the original figure do not match with the relevant discussion of Fig. 1 (on page 25753–25754) which referred to XRD patterns for g- C_3N_4 , $CaFe_2O_4$ and $CaFe_2O_4/g-C_3N_4/CNT$ composite. The correct image for Fig. 1 is shown below but no changes are required to the associated discussion of Fig. 1.

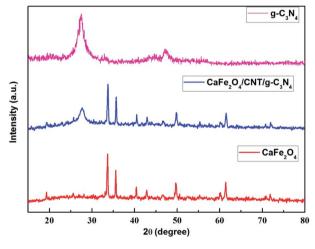

Fig. 1 XRD patterns of the as-prepared CaFe₂O₄ and CaFe₂O₄/g-C₃N₄/CNT composite.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
