## Correction: Enantioselective, convergent synthesis of the ineleganolide core by a tandem annulation cascade†

Robert A. Craig, II, Jennifer L. Roizen, Russell C. Smith, Amanda C. Jones, Scott C. Virgil and Brian M. Stoltz\*

DOI: 10.1039/c8sc90236d

[www.rsc.org/chemicalscience](http://www.rsc.org/chemicalscience)Correction for 'Enantioselective, convergent synthesis of the ineleganolide core by a tandem annulation cascade' by Robert A. Craig II *et al.*, *Chem. Sci.*, 2017, 8, 507–514.

Since publication of the original manuscript, the authors have carried out some additional research and can now unambiguously confirm the reassignment of a few late-stage, intermediate compounds that were incorrectly assigned in the original manuscript. Specifically, they have obtained an X-ray structure of the product of Amberlyst® treatment of the mixture of compounds **32** and **S2** and the product obtained is epimeric at C7. To avoid confusion, this new product is called product **ent-12A**. An updated and corrected Scheme 5 is provided below.

Additional Supplementary Information is provided, containing details of the newly solved X-ray crystal structure.

For a complete discussion, please see the authors' recently published account of their research program toward the enantioselective synthesis of ineleganolide.<sup>1</sup>
