Expression of concern: Novel mesoporous amorphous B–N–O–H nanofoam as an electrode for capacitive dye removal from water

Sam Keltie

Expression of concern for 'Novel mesoporous amorphous B–N–O–H nanofoam as an electrode for capacitive dye removal from water' by Ming Ming Chen *et al.*, *J. Mater. Chem. A*, 2017, 5, 21400–21413.

The following article 'Novel mesoporous amorphous B–N–O–H nanofoam as an electrode for capacitive dye removal from water' by Ming Ming Chen, Da Wei, Wei Chu, Li Ping Hou and Dong Ge Tong has been published in *Journal of Materials Chemistry A*. The article reports the preparation of B–N–O–H nanofoam and its use as an electrode for capacitive dye removal from water.

Journal of Materials Chemistry A is publishing this expression of concern in order to alert our readers that we are presently unable to confirm the accuracy of the data reported in Fig. S2a, S9a and b, S11a–d and S25e of the ESI.

An investigation is underway, and this notice will be updated when a final outcome is reached.
