## Correction: A silver–manganese dual co-catalyst for selective reduction of carbon dioxide into carbon monoxide over a potassium hexatitanate photocatalyst with water

Xing Zhu,<sup>a</sup> Akira Yamamoto,<sup>ab</sup> Shota Imai,<sup>c</sup> Atsuhiko Tanaka,<sup>de</sup> Hiroshi Kominami<sup>d</sup> and Hisao Yoshida<sup>\*ab</sup>

Correction for 'A silver–manganese dual co-catalyst for selective reduction of carbon dioxide into carbon monoxide over a potassium hexatitanate photocatalyst with water' by Xing Zhu *et al.*, *Chem. Commun.*, 2019, **55**, 13514–13517.

The authors regret that there were some errors in the original article. In the caption for Fig. 3, the descriptions of Fig. 3Be and Bf were the wrong way around. The correct caption for Fig. 3 is as shown below.

**Fig. 3** [A] Ag K-edge XANES of (a)  $\text{Ag}_2\text{O}$ , (b) Ag foil, (c)  $\text{Ag}(1.0)/\text{KTO}$ , and (d)  $\text{Ag}(1.0)\text{--Mn}(0.09)/\text{KTO}$ , and [B] Mn K-edge XANES of (a) Mn foil, (b) MnO, (c)  $\text{Mn}_2\text{O}_3$ , (d)  $\text{MnO}_2$ , (e)  $\text{Ag}(1.0)\text{--Mn}(0.09)/\text{KTO}$ , and (f)  $\text{Mn}(0.15)/\text{KTO}$ .

On page 13516, line 29 in the left column, the corresponding text discussing the figure should be corrected as follows:

“In detail, the edge position of the spectra for the  $\text{Ag}(1.0)\text{--Mn}(0.09)/\text{KTO}$  and  $\text{Mn}(0.15)/\text{KTO}$  samples (Fig. 3Be and Bf) was close to that for  $\text{Mn}_2\text{O}_3$  (Fig. 3Bc). However, the main peak position for the two samples was close to that for MnO (Fig. 3Bb) and the second peak at the post edge for the  $\text{Mn}(0.15)/\text{KTO}$  sample was close to that for the main peak for  $\text{MnO}_2$  (Fig. 3Bd).”

In the Supplementary Information, the descriptions of samples (e) and (f) in the caption for Fig. S10 were also incorrect, and have now been corrected in the updated ESI file available online.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
