## Correction: Fabrication of red blood cell membrane-camouflaged $\text{Cu}_2\text{-xSe}$ nanoparticles for phototherapy in the second near-infrared window

Zhou Liu,<sup>a</sup> Jinquan Wang,<sup>b</sup> Kangqiang Qiu,<sup>a</sup> Xinxing Liao,<sup>a</sup> Thomas W. Rees,<sup>a</sup> Liangnian Ji<sup>a</sup> and Hui Chao<sup>\*ac</sup>

Correction for 'Fabrication of red blood cell membrane-camouflaged  $\text{Cu}_2\text{-xSe}$  nanoparticles for phototherapy in the second near-infrared window' by Zhou Liu *et al.*, *Chem. Commun.*, 2019, **55**, 6523–6526.

The authors regret that there was an error in the original Supplementary Information file for their article. An incorrect image was included in Fig. S10D. The image for the  $\text{RBC@Cu}_2\text{-xSe NPs}$  sample was duplicated in place of the  $\text{Cu}_2\text{-xSe NPs}$  sample image in error. The correct image has been included in an updated version of the Supplementary Information, which has now been published online. The corrected figure is presented below.

**Fig. S10** (A) Temperature elevations of tumor-bearing mice in  $\text{Cu}_2\text{-xSe NPs}$  and  $\text{RBC@Cu}_2\text{-xSe NPs}$  at the tumor location during 1064 nm laser irradiation. (B) The IR thermal images of tumor-bearing mice in  $\text{Cu}_2\text{-xSe NPs}$  and  $\text{RBC@Cu}_2\text{-xSe NPs}$  at the tumor location. (C) Body weight data of different groups after treatment in 20 days. (D) H&E staining on tumor sites from HepG2 tumor-bearing mice after various treatments. Scale bar: 50  $\mu\text{m}$ .

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
