Correction for 'O<sup>2</sup>-(6-Oxocyclohex-1-en-1-yl)methyl diazen-1-ium-1,2-diolates: a new class of nitric oxide donors activatable by  $GSH/GST\pi$  with both anti-proliferative and anti-metastatic activities against melanoma' by Chengfeng Bai et al., Chem. Commun., 2017, 53, 5059-5062.

The authors regret that in the original article incorrect images were used for the "Control" panel in Fig. 2A and for the "COMC-6" panel in Fig. 2B. To completely correct the errors, the experiments presented in Fig. 2A and B were re-performed, and the original images in Fig. 2A and B should be replaced with the new images.

The correct Fig. 2 is presented here. The corrected figure does not affect any results presented in the originally-published version, nor the corresponding text description or the conclusion of the paper.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.

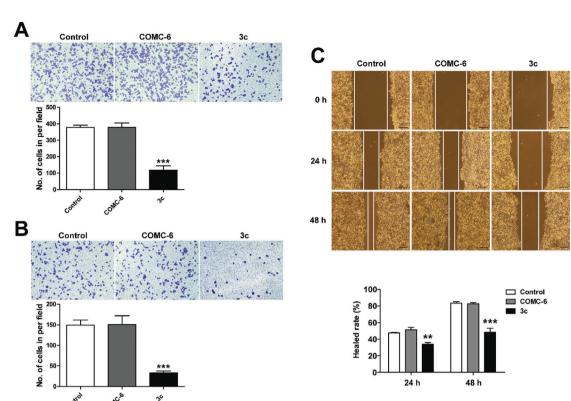

Fig. 2 (A) Effects of compounds on B16–BL6 cell migration. Data were expressed as the mean  $\pm$  SD of each group of cells. \*\*\* P < 0.001. (B) Effects of compounds on B16-BL6 cell invasion. Data were expressed as the mean  $\pm$  SD of each group of cells. \*\*\* P < 0.001. (C) Effects of compounds on B16-BL6 cell lateral migration. Data are expressed as the mean  $\pm$  SD of each group of cells. \*\* P < 0.01, \*\*\* P < 0.001. Scale bars: 200  $\mu$ m.
