The authors regret some inconsistencies between the main text and the Supporting Information, which were brought to our attention by a watchful reader.

The ⁷⁷Se-NMR chemical shifts of compounds 6 and 9(BF₄) were partially improperly referenced and the values were unfortunately mixed up while preparing the manuscript. The corrected values are shown below and a corrected version of the ESI has been deposited, which is available online.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
