Retraction: Influence of aqueous sulfide on speciation of U(VI) adsorbed to nanomagnetite

Yubing Sun,^a Jianhui Lan,^b Mengxue Li,^c Wei Hu,^c Haibo Liu,^c Gang Song,^d Diyun Chen,^d Weiqun Shi^{*b} and Xiangke Wang^{*a}

Retraction of 'Influence of aqueous sulfide on speciation of U(VI) adsorbed to nanomagnetite' by Yubing Sun *et al.*, *Environ. Sci.: Nano*, 2018, 5, 1981–1989.

The Royal Society of Chemistry, with the agreement of the named authors, hereby wholly retracts this *Environmental Science: Nano* article due to concerns with the reliability of the data in the published article.

Repeating fragments can be observed in three of the XRD spectra in Fig. 2B (pink, blue and black spectra), which indicates that they have been manipulated.

Given the significance of the concerns about the validity of the data, the findings presented in this paper are no longer reliable.

Signed: Yubing Sun, Gang Song, Weiqun Shi and Xiangke Wang

Date: 27th March 2020

Jianhui Lan, Mengxue Li, Wei Hu, Haibo Liu and Diyun Chen were contacted but did not respond.

Retraction endorsed by Sam Keltie, Executive Editor, *Environmental Science: Nano*

Note after first publication

An email address has been included for the co-corresponding author, Xiangke Wang. The authors regret omitting the email address from the retracted article and retraction notice.
