Correction for 'Bioaccessibility and biotransformation of anthocyanin monomers following *in vitro* simulated gastric-intestinal digestion and *in vivo* metabolism in rats' by Yao Chen *et al.*, *Food Funct.*, 2019, **10**, 6052–6061, DOI: 10.1039/C9FO00871C.

The authors regret that the value of  $C_{\max}$  is given incorrectly in Table 2 in the original article. The correct version of Table 2 is shown below.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.

**Table 2** Plasma pharmacokinetic parameters following intragastric administration of 50 mg kg<sup>-1</sup> of cyanidin-3-*O*-glucoside (C3G) in rats

Parameter	<i>x</i>	Parameter	<i>x</i>
$K_a$ (h <sup>-1</sup> )	0.47	$C_{\max}$ (nmol L <sup>-1</sup> )	$1.41 \times 10^4$
$t_{1/2}$ (h)	0.30	MRT <sub>0-t</sub> (h)	2.63
$t_{\max}$ (h)	0.75	AUC <sub>0-t</sub> (hμg mL <sup>-1</sup> )	20.08

$K_a$  (h<sup>-1</sup>), absorption rate constant;  $t_{1/2}$  (h), half life;  $t_{\max}$  (h), time describing;  $C_{\max}$  (nmol L<sup>-1</sup>), maximum concentration; MRT<sub>0-t</sub> (h), mean residence time; AUC<sub>0-t</sub> (hμg mL<sup>-1</sup>), the area under the curve.
