## Correction: The conversion of a high concentration of lignin to cyclic alkanes by introducing Pt/HAP into a Ni/ASA catalyst

Shufang Qin,<sup>a</sup> Bolong Li,<sup>a</sup> Zhicheng Luo<sup>\*a</sup> and Chen Zhao<sup>\*a,b</sup>

Correction for 'The conversion of a high concentration of lignin to cyclic alkanes by introducing Pt/HAP into a Ni/ASA catalyst' by Shufang Qin et al., *Green Chem.*, 2020, **22**, 2901–2908, DOI: 10.1039/D0GC00243G.

Fig. 4 should be displayed in colour, in order to distinguish between the Pt/HAP and Ni/ASA catalysts. The corrected Fig. 4 is displayed below.

**Fig. 4** The proposed reaction mechanism for lignin HDO catalyzed by Pt/HAP + Ni/ASA. Reaction conditions: lignin (12.0 g), Pt/HAP (3.0 g) + Ni/ASA (3.0 g), dodecane (80 mL), 300 °C, 6 MPa H<sub>2</sub>, stirring at 600 rpm.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
