Correction for 'Nitrogen-doped carbon nanotubes as an anode for a highly robust potassium-ion hybrid capacitor' by Xiuqi Li *et al.*, *Nanoscale Horiz.*, 2020, DOI: 10.1039/d0nh00451k.

Regrettably, the power density of the NCNT anode should be  $1713.4 \text{ W kg}^{-1}$ , and the unit for power density should be  $\text{W kg}^{-1}$  (not  $\text{W h kg}^{-1}$ ) in the last paragraph of the Introduction section of the original manuscript.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
