## Correction: Zn capped Al<sub>2</sub>O<sub>3</sub> and TiO<sub>2</sub> nanoporous arrays as pH sensitive drug delivery systems: a combined experimental and simulation study

Rokhsareh Khodabandeh,<sup>a</sup> Fatemeh Mohammadpour,\*<sup>b</sup> Amin Reza Zolghadr\*<sup>a</sup> and Axel Klein\*<sup>ac</sup>

DOI: 10.1039/d0ni90146f

rsc.li/njc

Correction for 'Zn capped  $Al_2O_3$  and  $TiO_2$  nanoporous arrays as pH sensitive drug delivery systems: a combined experimental and simulation study' by Rokhsareh Khodabandeh *et al.*, *New J. Chem.*, 2020, **44**, 16602–16612, DOI: 10.1039/D0NJ02840A.

The authors regret that an error was made in the second paragraph of section 3.4 of the manuscript.

The original version said:

The initial phase of the drug release from the  $Al_2O_3$  sample with the open pores (Fig. 6) showed a markedly slower release from  $Al_2O_3$  (15% at 2.5 h) compared with  $TiO_2$  (30% at 2.5 h). Also the half value is only reached at 4 h for  $TiO_2$  (15 h for  $Al_2O_3$ ).

The correct statement is:

The initial phase of the drug release from the samples with the open pores (Fig. 6) showed a markedly slower release from  $TiO_2$  (15% at 2.5 h) compared with  $Al_2O_3$  (30% at 2.5 h). Also the half value is only reached at 15 h for  $TiO_2$  (4 h for  $Al_2O_3$ ).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
