Correction for 'A rapid hemostatic sponge based on large, mesoporous silica nanoparticles and N-alkylated chitosan' by Zihao Chen *et al.*, *Nanoscale*, 2018, **10**, 20234–20245, DOI: 10.1039/C8NR07865C.

The authors have noticed that the formula given for the haemolysis ratio (HR) calculated during the haemolytic tests is incorrect. The correct formula should be as described by Yuan Yuan, Hua Hong and Changsheng Liu *et al.*<sup>1</sup>

$$\text{HR}(\%) = \left[ \frac{(\text{OD}_{\text{sample}} - \text{OD}_{\text{negative control}})}{(\text{OD}_{\text{positive control}} - \text{OD}_{\text{negative control}})} \right] \times 100\%.$$

The authors confirm that the results in the paper were calculated with the correct formula and so they are unaffected by this typographical error. Additionally, the ORCID iD previously listed for Dr Feng Tian was incorrect. The correct ORCID iD is 0000-0003-3343-422X.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
