Correction: A library of action spectra for erythema and pigmentation

Alois W. Schmalwieser,^{*a} Silvia Wallisch^a and Brian Diffey^b

Correction for 'A library of action spectra for erythema and pigmentation' by Alois W. Schmalwieser et al., *Photochem. Photobiol. Sci.*, 2012, **11**, 251–268, DOI: 10.1039/c1pp05271c.

This article contains offensive and inappropriate language. The authors, The Royal Society of Chemistry and the Owner Societies do not in any way endorse or condone the use of discriminatory or offensive language. The Royal Society of Chemistry apologises that this terminology was not recognised and removed prior to publication. Since the publication of this article, our policies and processes have been significantly strengthened to ensure that discriminatory and offensive language is not included in our publications.

The authors emphasise that the two instances are both marked with clear citations to the original article and the text passages are cited exactly as in the original 1962 article.

This Correction removes offensive and inappropriate language in Table 10 and in the paragraph in the right hand column at the bottom of p. 265. An updated Table 10 and text is as displayed below.

The text at the bottom of p. 265 in the right hand column has been corrected to:

Pathak *et al.*⁹⁰ investigated immediate pigment darkening (IPD) in 7 individuals with pigmented skin on the inner aspect of the forearm.
