## Correction: Surface phosphonation treatment shows dose-dependent enhancement of the bioactivity of polyetheretherketone

Lvhua Liu,<sup>a</sup> Yanyan Zheng,<sup>\*a</sup> Qianyu Zhang,<sup>b</sup> Lin Yu,<sup>c</sup> Ziliang Hu<sup>d</sup> and Ying Liu<sup>\*b</sup>

DOI: 10.1039/d0ra90045a rsc.li/rsc-advances

Correction for 'Surface phosphonation treatment shows dose-dependent enhancement of the bioactivity of polyetheretherketone' by Lvhua Liu et al., RSC Adv., 2019, **9**, 30076–30086, DOI: 10.1039/C9RA05229A.

The authors regret that an incorrect version of Fig. 9 was included in the original article. The correct version of Fig. 9 is presented below.

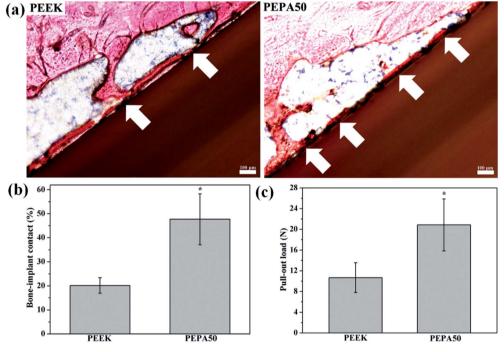

Fig. 9 (a) Hard tissue sections of toluidine blue-fuchsine stained around the implant at 12 weeks post-implantation with the white arrows marking the direct bone contact between bone tissue and PEEK substrates. (b) Percentage of bone-implant contact ratios and (c) pull-out load between bone tissue and the PEEK samples after implantation for 12 weeks; \*(p < 0.05) when compared to that of PEEK.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
