 Correction for 'Assessment of the toxicity and inflammatory effects of different-sized zinc oxide nanoparticles in 2D and 3D cell cultures' by Zhipan Wu, Rongfa Guan, Miao Tao *et al.*, *RSC Adv.*, 2017, **7**, 12437–12445, DOI: 10.1039/C6RA27334C.

The authors regret that in Fig. 1a, while the correct material is shown, the incorrect representative image was chosen, in which the overall distribution of nanoparticles was not clear. The correct image is given here.

Fig. 1 (A) Microscopy characterizations of ZnO NPs. TEM images of an average: (a) 24 nm ZnO NPs (the average particle size).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
