Correction for 'Tuning radical interactions in triradical tricationic complexes by varying host-cavity sizes' by Kang Cai et al., *Chem. Sci.*, 2020, DOI: 10.1039/c9sc04860j.

The authors regret that the  $K_a$  values in Fig. 1c and d are incorrect in the original manuscript. The correct figure is displayed below.

Fig. 1 Vis-NIR Spectra (MeCN, 2 mm cuvette) on titrating  $MV^{2+}$  into (a)  $PyBB^{2(+)}$  (0.25 mM); (b)  $mpBB^{2(+)}$  (0.25 mM); (c)  $DThBB^{2(+)}$  (0.20 mM); (d)  $ThBB^{2(+)}$  (0.25 mM). The inset shows the change in absorbance at 1080 nm with titration. The curve fitting is highlighted in red.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
