We would like to take this opportunity to thank all of *Chemical Science's* reviewers, and in particular highlight some of the Outstanding Reviewers for the journal in 2019, as selected by the editorial team for their significant contribution to *Chemical Science*. We announce our Outstanding Reviewers annually and each receives a certificate to give recognition for their contribution.

As in previous years, our Outstanding Reviewers list is compiled based on the number, timeliness and quality of the reports provided by reviewers over the last 12 months, as we want to recognise the hard work put in by these individuals. However we do acknowledge that the number of high-quality reports should not be the only measure of an individual's contribution, and that every contribution to the peer-review for *Chemical Science* from the community is valuable and crucial to ensuring the quality of the journal. We are actively working with our Editors to ensure that our reviewer community reflects our diverse author community, and are considering additional ways that individuals can be recognized for their contribution to the journal.
