Correction: Identifying the anionic redox activity in cation-disordered Li_{1.25}Nb_{0.25}Fe_{0.50}O₂/C oxide cathodes for Li-ion batteries

Mingzeng Luo,^a Shiyao Zheng,^a Jue Wu,^{ab} Ke Zhou,^a Wenhua Zuo,^a Min Feng,^c Huajin He,^a Rui Liu,^{ad} Jianping Zhu,^a Gang Zhao,^e Shijian Chen,^a Wanli Yang,^b Zhangquan Peng,^f Qihui Wu^g and Yong Yang^{*ae}

DOI: 10.1039/d0ta90144i

rsc.li/materials-a

Correction for 'Identifying the anionic redox activity in cation-disordered Li_{1.25}Nb_{0.25}Fe_{0.50}O₂/C oxide cathodes for Li-ion batteries' by Mingzeng Luo *et al.*, *J. Mater. Chem. A*, 2020, **8**, 5115–5127, DOI: 10.1039/C9TA11739C.

The authors regret an error in the 'Materials characterization' section of the published article, on page 5117.

The text: "The cells were charged/discharged with a constant current (40 mA g^{-1}) at room temperature" should instead read as follows: "The cells were charged/discharged with a constant current (60 mA g^{-1}) at room temperature".

Furthermore, the authors regret an error in a sample name in the 'Results and discussion' section of the published article, on page 5118.

The text: "In the second charge, the absorption edge of the 2C3.80 sample shifts back to the same position as the 1D1.50 sample, which suggests the reversible oxidation of Fe^{2+} to Fe^{3+} " should instead read as follows: "In the second charge, the absorption edge of the 2C3.80 sample shifts back to the same position as the 1D2.60 sample, which suggests the reversible oxidation of Fe^{2+} to Fe^{3+} ".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
