Correction: High-loaded single Cu atoms decorated on N-doped graphene for boosting Fenton-like catalysis under neutral pH

Qianyuan Wu,^a Jin Wang,^b Zhiwei Wang,^c Yalan Xu,^c Zhihui Xing,^a Xinyang Zhang,^a Yuntao Guan,^a Guangfu Liao^{*d} and Xinzheng Li^{*a}

Correction for 'High-loaded single Cu atoms decorated on N-doped graphene for boosting Fenton-like catalysis under neutral pH' by Qianyuan Wu *et al.*, *J. Mater. Chem. A*, 2020, DOI: 10.1039/d0ta04943c.

The authors regret that Fig. 7 is missing in the published article. The added Fig. 7 is as shown here.

In the section 'Catalyst reusability' within the published article, the citation to 'Fig. 6' in the sentence that reads "The reusability of Cu-SA/NGO for APAP degradation is shown in Fig. 6" should instead read 'Fig. 7'.

Fig. 7 Reusability of Cu-SA/NGO for APAP degradation. Reaction conditions: 20 mg L⁻¹ APAP, pH = 7, 20 mM H₂O₂, 0.05 g L⁻¹ catalyst, 30 °C.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
