Correction for 'BODIPY-containing nanoscale metal–organic frameworks as contrast agents for computed tomography' by Tao Zhang *et al.*, *J. Mater. Chem. B*, 2017, **5**, 2330–2336, DOI: 10.1039/C7TB00392G.

The authors of the original publication have noticed that an incorrect computed tomography (CT) image was chosen for the '12 h' images in Scheme 1 and Fig. 5a, as well as in the graphical abstract image (replicated Scheme 1). Corrected versions of Scheme 1 and Fig. 5 are provided below. The authors have confirmed that this does not affect the final results or scientific conclusions reached in the original publication.

**Scheme 1** Schematic illustration of the synthesis of UiO-PDT nanocrystals and their application for *in vivo* X-ray CT imaging and biological studies.

Fig. 5 *In vivo* CT images of a rat after injection of UiO-PDT nanocrystals at the dosage of  $0.1 \text{ mg g}^{-1}$  body weight. (a) CT images for the ventral sides of rat. (b) CT images for the lateral sides of rat. (c) 3D-Reconstruction of *in vivo* CT images reveals the ventral sides of hepatic tumors. The hepatic tumors are highlighted by red circles. (d) The change in HU values for UiO-PDT samples at different injection times.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
