Correction for 'Growing a backbone – functional biomaterials and structures for intervertebral disc (IVD) repair and regeneration: challenges, innovations, and future directions' by Matthew D. Harmon *et al.*, *Biomater. Sci.*, 2020, 8, 1216–1239, DOI: 10.1039/C9BM01288E.

The authors regret that copyright permission was not obtained for the upper panel of images in Fig. 3 in the original article. This permission has now been granted and the correct figure caption and full citation can be seen here.

Fig. 3 Engineering components for IVD repair and regeneration. The upper left panel shows a healthy human disc and the upper right panel shows a degenerated disc. This has been reproduced with permission from Elsevier.¹ Below are depicted the main approaches towards regenerative medicine, *i.e.* the application of biomaterials, regenerative factors inhibiting inflammation and exogenously added cells.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
