## Correction: Antibody recruiting molecules (ARMs): synthetic immunotherapeutics to fight cancer

Silvia Achilli, Nathalie Berthet\* and Olivier Renaudet\*

Correction for 'Antibody recruiting molecules (ARMs): synthetic immunotherapeutics to fight cancer' by Silvia Achilli *et al.*, *RSC Chem. Biol.*, 2021, **2**, 713–724. DOI: 10.1039/d1cb00007a.

The authors regret mistakes in the structures depicted in Table 1, entry A and Table 2, entry B. The correct version of both tables are shown below. The conclusions of the paper have not been affected.

**Table 1** Examples of ARMs against cancer cells

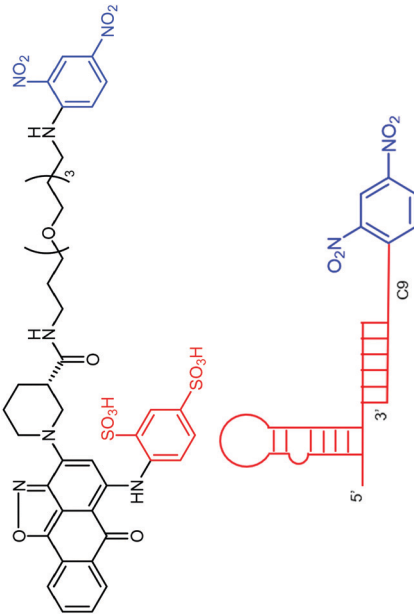

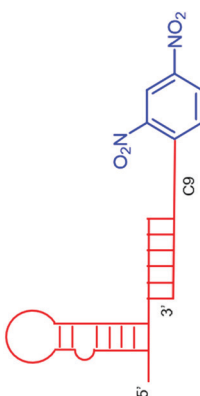

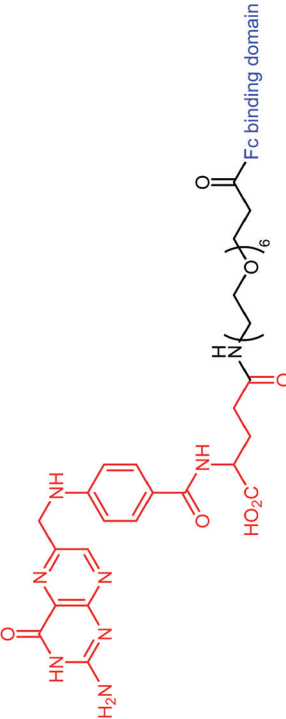

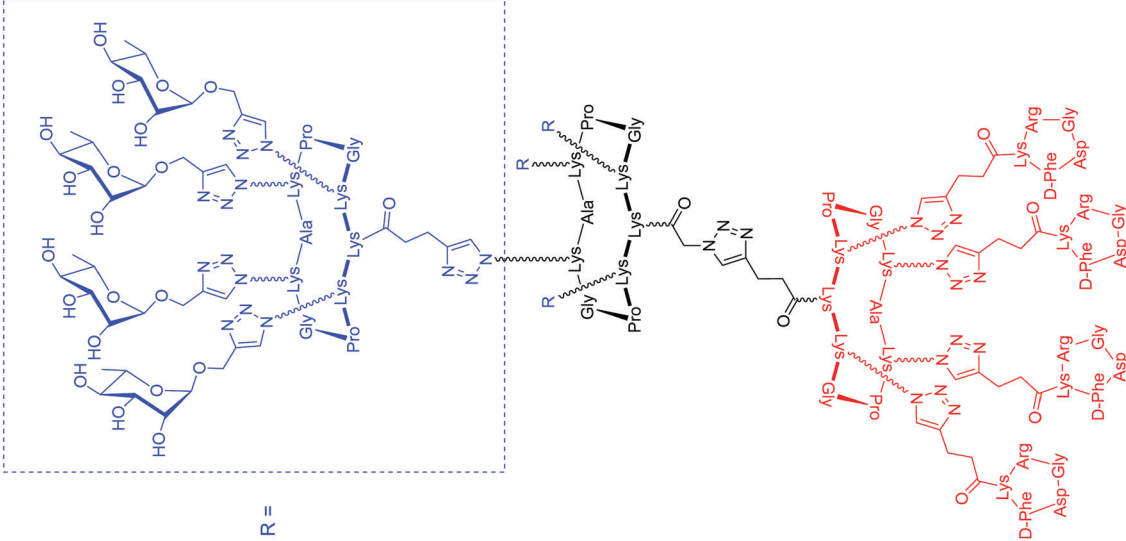

Entry	Tumor target	ARM valency	ABM	TBM	ARM structure
A <sup>41</sup>	uPAR	Mono	DNP	uPAR inhibitor	
B <sup>46</sup>	VEGF/osteopontin	Mono	DNP	anti-VEGF and anti-osteopontin aptamer	
C <sup>51</sup>	Folate receptor	Mono	Fc-binding cyclic peptide	Folic acid	
D <sup>55</sup>	PSMA	Mono	DNP	Glutamate urea	

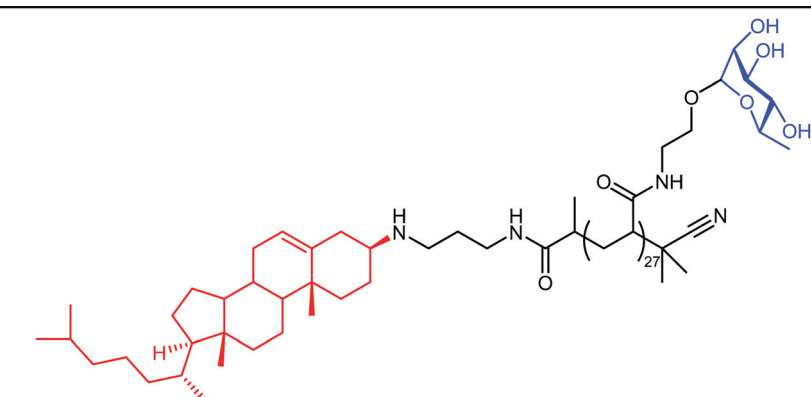

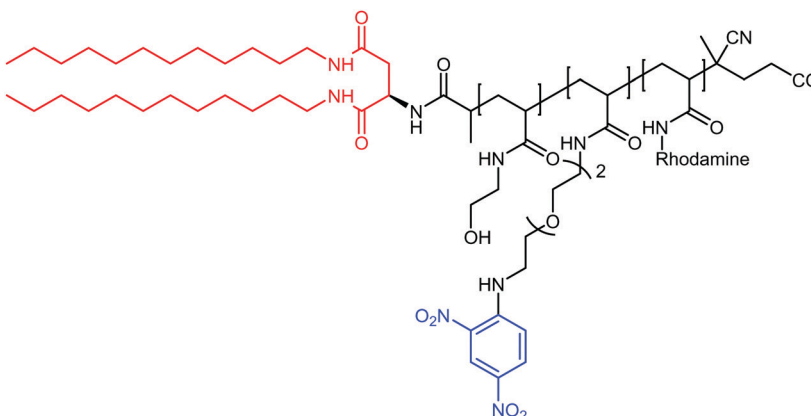

Table 1 (continued)

Entry	Tumor target	ARM valency	ABM	TBM	ARM structure
E <sup>56</sup>	$\alpha_v\beta_3$ integrins	Multi	1-Rha	cRGD	 <p>R =</p>

**Table 2** Example of ARMs using unspecific targeting of the cancer cell membrane with lipid anchor

Entry	Tumor target	ARM valency	ABM	TBM	ARM structure
A <sup>12</sup>	uPAR	Multi	L-Rha	CholA anchor	
B <sup>65</sup>	VEGF/osteopontin	Multi	DNP	Di-alkyl anchor	

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
