Correction: Small-molecule-based human genome G4 profiling reveals potential gene regulation activity

Weiwu Zeng,^a Fan Wu,^a Chaoxing Liu,^a Yan Yang,^b Bingyao Wang,^b Yushu Yuan,^a Jiaqi Wang,^a Yuqi Chen,^a Boshi Fu,^a Zhiguo Wu^{*c} and Xiang Zhou^{*a}

Correction for 'Small-molecule-based human genome G4 profiling reveals potential gene regulation activity' by Weiwu Zeng *et al.*, *Chem. Commun.*, 2019, **55**, 2269–2272, DOI: 10.1039/C8CC10052G.

The following errata were present in the published article. All the data analyses in the original article are correct. Likewise, the results and conclusions remain unaffected.

The structure of PDP-PEG₂₄-biotin in Fig. 1a and Scheme S1 in the ESI (now corrected) was in error since a nitrogen atom was missing in each quinoline moiety. Thus the published structure of PDP-PEG₂₄-biotin should be corrected as:

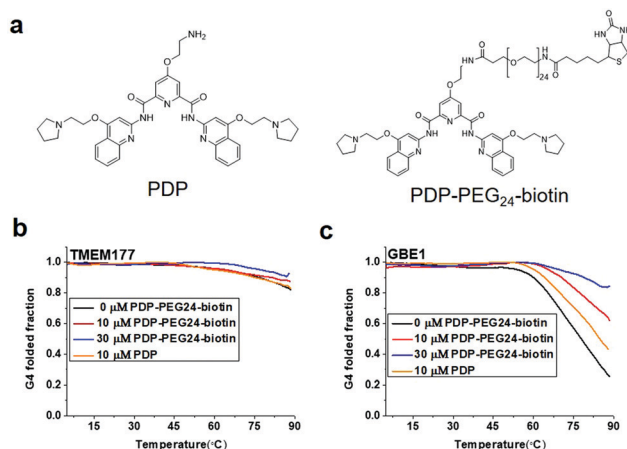

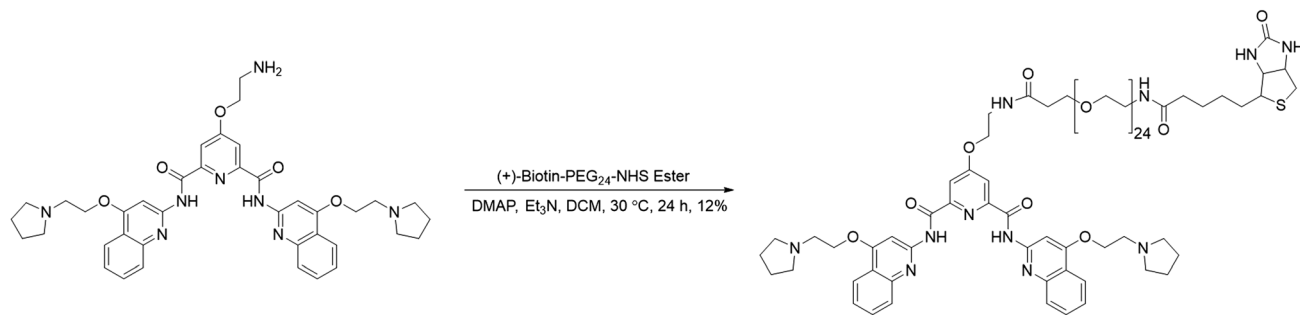

Fig. 1 (a) Structures of PDP and PDP-PEG₂₄-biotin. (b) and (c) Stabilization effect of PDP-PEG₂₄-biotin and PDP on G-quadruplex oligos TMEM177 (b) and GBE1 (c).
