Correction: Oxidative dehydrogenation of propane over transition metal sulfides using sulfur as an alternative oxidant

Allison M. Arinaga, Shanfu Liu and Tobin J. Marks*

DOI: 10.1039/d1cy90031e

rsc.li/catalysis

Correction for ‘Oxidative dehydrogenation of propane over transition metal sulfides using sulfur as an alternative oxidant’ by Allison M. Arinaga *et al.*, *Catal. Sci. Technol.*, 2020, 10, 6840–6848, DOI: 10.1039/D0CY01039A.

The NSF grant number for the Center for Innovative and Strategic Transformation of Alkane Resources was incorrect in the original article. The full and correct acknowledgement list of funding agencies and award numbers is as shown below.

We thank the Center for Innovative and Strategic Transformation of Alkane Resources (CISTAR, NSF award number EEC-1647722) for supporting this project. The authors acknowledge Prof. Justin Notestein for helpful discussions and Dr. Neil Schweitzer for use of the Northwestern Reactor Engineering and Catalysis Testing (REACT) facility. This work made use of the Jerome B. Cohen X-ray Diffraction Facility supported by the MRSEC program of the National Science Foundation (DMR-1720139) at the Materials Research Center of Northwestern University and the Soft and Hybrid Nanotechnology Experimental (SHyNE) Resource (NSF ECCS-1542205). This work made use of the Keck-II facility of Northwestern University's NUANCE Center, which has received support from the Soft and Hybrid Nanotechnology Experimental (SHyNE) Resource (NSF ECCS-1542205); the MRSEC program (NSF DMR-1720139) at the Materials Research Center; the International Institute for Nanotechnology (IIN); the Keck Foundation; and the State of Illinois, through the IIN.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
