Retraction: Polymer nanodots of graphitic carbon nitride as effective fluorescent probes for the detection of Fe^{3+} and Cu^{2+} ions

Shouwei Zhang, [a,b] Jiaxing Li, [c] Meiyi Zeng, [b] Jinzhang Xu, [b] Xiangke Wang*[a,c] and Wenping Hu*[d]

Retraction of 'Polymer nanodots of graphitic carbon nitride as effective fluorescent probes for the detection of Fe^{3+} and Cu^{2+} ions' by Shouwei Zhang *et al.*, *Nanoscale*, 2014, **6**, 4157–4162, DOI: 10.1039/C3NR06744K.

The Royal Society of Chemistry, with the agreement of the authors, hereby wholly retract this *Nanoscale* article due to concerns with the reliability of the data in the published article. Repeating fragments can be observed in the TEM images in Fig. 1B and C, indicating that these images have been manipulated. The first author initially requested to retract this article because he admitted that Photoshop technology was used in the preparation of Fig. 1. The authors subsequently requested to correct the article based on updated experimental data. The authors apologize for any inconvenience to readers.

Signed: Shouwei Zhang, Jiaxing Li, Meiyi Zeng, Jinzhang Xu, Xiangke Wang and Wenping Hu

Date: 11th August 2021
