 Correction for 'Synthesis and structural characterization of CO₂-soluble oxidizers [Bu₄N]BrO₃ and [Bu₄N]ClO₃ and their dissolution in cosolvent-modified CO₂ for reservoir applications' by Katherine L. Hull *et al.*, *RSC Adv.*, 2020, 10, 44973–44980, DOI: 10.1039/D0RA09563J.

The authors regret that the value for the solubility of [Bu₄N]BrO₃ in the last sentence of the Results and discussion section was given incorrectly.

In the sentence beginning "Notably, the solubility of [Bu₄N]BrO₃ achieved..." on page 44978, the corrected sentence should read "Notably, the solubility of [Bu₄N]BrO₃ achieved (>0.12 wt%) with ethanol cosolvent significantly exceeds the typical concentrations utilized in the application (~0.03 wt%)".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
