 Retraction of 'Physics of excitons and their transport in two dimensional transition metal dichalcogenide semiconductors' by Bhaskar Kaviraj and Dharendra Sahoo, *RSC Adv.*, 2019, 9, 25439–25461, DOI: 10.1039/c9ra03769a.

The Royal Society of Chemistry, with the agreement of the authors, hereby wholly retracts this *RSC Advances* review article due to a significant amount of unattributed overlap of content in the Introduction, Section 6 and Conclusions with a *npj 2D Materials and Applications* article by Thomas Mueller *et al.*, which was not cited in this article.¹ In addition, there are portions of text overlap with papers cited in the main article, in particular ref. 64 in Section 2, ref. 92 in Section 3, ref. 104 in Section 4 and ref. 138 in Section 5.

The authors also regret their oversight in omitting to attribute Fig. 5 to its original source (ref. 92 in the original article).

Signed: Bhaskar Kaviraj and Dharendra Sahoo

Date: 22nd March 2021

Retraction endorsed by Laura Fisher, Executive Editor, *RSC Advances*
