Correction for 'Functionalized pyridine in pyclen-based iron(III) complexes: evaluation of fundamental properties' by Magy A. Mekhail *et al.*, *RSC Adv.*, 2020, **10**, 31165–31170. DOI: 10.1039/d0ra05756h.

In the original article, in Table 2, incorrect values for the models for Fe(L4) were given. The correct values for the models for Fe(L4) are given in Table 2 here.

Table 2 Formation constants (log β) of the ML species formed, Fe(II)/(III)

Complex	log β_{red} Fe(II)[a]	log β_{ox} Fe(III)[b]
[Fe(**L1**)]	14.18(5)	14.57
[Fe(**L2**)]	14.46(7)	14.70
[Fe(**L3**)]	12.41(2)	12.02
[Fe(**L4**)]	13.11(2)	12.91
[Fe(**L5**)]	12.30(2)	11.44

[a] $I = 0.15$ M NaCl and $T = 25.0$ °C. [b] Derived from eqn (1) (ref. 31) and $(Fe^{2+})_{aq}$, $E^{\circ\prime}Fe^{III}/Fe^{II} = -0.439$ *vs.* $[Fe(CN)_6]^{3-}/[Fe(CN)_6]^{4-}$.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
