Correction for 'Nanoarchitectonics of p-type BiSbTe with improved figure of merit *via* introducing PbTe nanoparticles' by Yuanyue Li *et al.*, *RSC Adv.*, 2021, **11**, 36636–36643, DOI: 10.1039/D1RA07138F.

The authors regret that affiliation *a* was incorrectly given in the original article. The correct affiliation is shown here.

In the sentence beginning “For instance, PF of the sample with $\chi = 0.5$ wt% is 33.8...” incorrect units were given. The corrected sentence is as follows: For instance, PF of the sample with $\chi = 0.5$ wt% is $33.8 \mu\text{W cm}^{-1} \text{K}^{-2}$ at 482 K, which is $\sim 33\%$ larger than that of the BST matrix ($25.5 \mu\text{W cm}^{-1} \text{K}^{-2}$).

In the sentence beginning “For instance, as to the sample with $\chi = 0.5$ wt%, κ decreases from 1.10...” incorrect units were given. The corrected sentence is as follows: For instance, as to the sample with $\chi = 0.5$ wt%, κ decreases from 1.10 to $0.99 \text{ W m}^{-1} \text{K}^{-1}$ at 482 K (a $\sim 10\%$ decline).

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
