Correction for 'Plasticizer and catalyst co-functionalized PEDOT:PSS enables stretchable electrochemical sensing of living cells' by Jing Yan *et al.*, *Chem. Sci.*, 2021, **12**, 14432–14440, DOI: 10.1039/d1sc04138j.

The authors regret that there was an error in the equation of the calibration curve of PPL/PDMS in Fig. 3. The correct version is shown below.

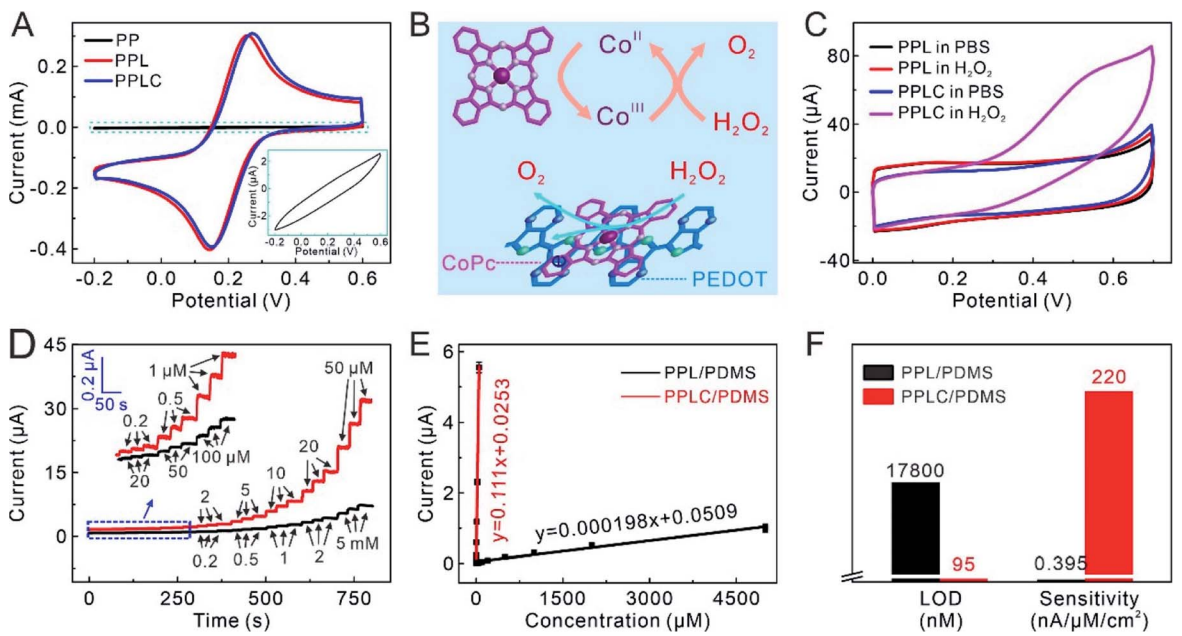

Fig. 3 (A) CVs of different electrodes obtained in 10 mM $K_3[Fe(CN)_6]$. Inset: the enlarged view for CV of the PP electrode. (B) Schematic illustration of the electrocatalysis mechanism. (C) CVs of different electrodes with and without 1 mM $H_2O_2$. (D) Amperometric responses of PPL/PDMS (black lines) and PPLC/PDMS (red lines) electrodes to $H_2O_2$ at a potential of +0.55 V (*vs.* Ag/AgCl) to increasing $H_2O_2$ concentrations. Inset: the enlargements of amperometric responses framed in blue. (E) Calibration curves of PPL/PDMS and PPLC/PDMS electrodes to increasing $H_2O_2$ concentrations (data presented as mean ± standard error, $n = 3$). (F) Calculated LOD and sensitivity of PPL/PDMS and PPLC/PDMS electrodes to $H_2O_2$.

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
